Chemical of the Month

Surefoot EZ

Surefoot EZ is a new-generation foaming cleaner and degreaser. It employs bioactive enzymes to digest oils and food soils without the use of harsh caustic chemicals. Its powerful surfactants penetrate the pores in quarry tile, terrazzo, marble and grout, carrying its enzymes along to accelerate cleaning. These enzymes reduce odor caused by decay and reduce slippage as they digest oils and greases that make floors slick. As an added benefit, product flushed down the drain also digests oils and greases. Floors cleaned with Surefoot EZ produces positive traction, resulting in a cleaner, safer work environment.
